EXPERIENCE

IMARTICUS LEARNING | FULL STACK DEVELOPER INTERN

August 2025 – Present | Pre-Placement Offer Received

- **SPIPA LMS:** Built an offline-first, govt. LAN-based LMS for 200K+ users; achieved 130ms avg. API response, 93% Redis cache hit rate, and 99.97% uptime over 30 days.
- **AI Pipeline:** Designed a RabbitMQ batch worker (priority queues, fault tolerance) powering AI Summarization, AI Tutor, and Grill Master mock-interview features using Gemini 2.5.
- **Security:** Led VAPT audit resolution for PMRC (Govt. of India); closed 29 vulnerabilities including IDOR, JWT bypass, brute-force, and CSP misconfigurations.
- **Payments & Integrations:** Implemented Razorpay/Stripe payment flows, added new payment-type architecture; built i18n translation pipeline for Japanese and Arabic expansion.
- **Cost & Infra:** Optimized Gemini token usage, automated HDFC bank account reconciliation via Lambda, and built Hachiko health-check alerting for production services.
- **Tech Stack:** Node.js, React.js, MongoDB, Redis, RabbitMQ, AWS (S3, EC2, Lambda), Next.js, PHP/MySQL, AngularJS.

KEY PROJECTS

SPIPA — GOVT. LMS (IMARTICUS) | NODE.JS, REACT, MONGODB, REDIS, RABBITMQ

2025

- Architected an offline-first LMS for Sardar Patel Institute of Public Administration (Gujarat), deployed on a secure govt. LAN with zero cloud dependency, supporting 200K+ concurrent users.
- Delivered role-based access control (Super Admin, Course Manager, Batch Operator), bilingual UI (English/Gujarati), bulk CSV user import (99.8% success), facial + GPS attendance, and automated certificate generation at 250/min.

PMRC — PM RESEARCH CHAIR PORTAL (GOVT. OF INDIA) | NEXT.JS, NODE.JS,

MONGODB, RJSF

2025

- Built full-stack portal for a GoI flagship initiative: static pages, auth flows, dashboards for 5 roles, and dynamic application forms (RJSF).
- Cleared Stage-1 and Stage-2 VAPT security audits; resolved 29 vulnerabilities including IDOR, brute-force OTP, JWT bypass, clickjacking, and privilege escalation.

FULL-STACK E-COMMERCE WEB APP | REACT, NODE.JS, MONGODB

2024

- Built a responsive e-commerce platform with JWT auth, Cloudinary image uploads, PayPal payments, and an admin dashboard with ApexCharts analytics.

ACHIEVEMENTS

- **Finalist** – Smart India Hackathon 2024 (Backend Dev + Team Lead)
- **Patented** – 2 IoT-based innovations filed during B.Tech

SKILLS

LANGUAGES

C++ • JavaScript • TypeScript • Python

FRONTEND

React.js • Next.js • Redux Toolkit • Tailwind CSS • AngularJS

BACKEND

Node.js • Express.js • PHP • MongoDB • MySQL • REST APIs

DEVOPS / INFRA

AWS (S3, EC2, Lambda) • Redis • RabbitMQ • Linux

SECURITY / TOOLS

Git • Burp Suite • Metasploit • VAPT • OWASP

EDUCATION

AKGEC (AKTU)

B.TECH IN COMPUTER SCIENCE

2022 – 2026

CGPA: 7.59 / 10

G.R. GLOBAL ACADEMY, DADRI

INTERMEDIATE

2021 | 94%

DSR MODERN SCHOOL, DADRI

HIGH SCHOOL

2019 | 95%

CERTIFICATIONS

Ethical Hacking & Countermeasures –
Craw Security (Oct 2023)
EC-Council Cybersecurity for
Business (ID: 296257)

PATENTS

IoT-Enabled Street Light Regulation
System Published: Jan 2024
Smart Field Personnel Monitoring
System Published: Oct 2023

CO-CURRICULAR

Co-founder & Coordinator Centre for
Future Studies and Research, AKGEC
Organized MARE'24 workshop; led
cybersecurity sessions and technical
recruitment.
